

ABBREVIATED TITLES OF A SELECTION FROM SWEDENBORG'S WORKS

PREFATORY NOTE

In regard to Swedenborg's works which are frequently cited in articles published in *The New Philosophy*, we make two observations. Firstly, contributors commonly make a distinction between those works which are essentially theological (referred to as "the Writings" or "the Heavenly Doctrine") and those which are essentially scientific or philosophical (referred to as "the pre-theological works"). And secondly, all references to Swedenborg's works are given by section number, not by page unless so stated. When reference is made to a particular section in a work, the title of the work is abbreviated—as given in the accompanying table—and this is immediately followed by the number; thus (AC 590) refers to section 590 in *Arcana Coelestia*.

In the tabulation below, titles marked with an asterisk were published posthumously.
